

• COMPETITIVE RESEARCH — SEPTEMBER 2026

Where funkraus stands in the German BZF market

A review of the online BZF I/II preparation market: who else is selling to the same student, how funkraus compares on offer, SEO and content, design and trust — and what it takes to go from "a good course" to "a market threat."

Strong product, close to zero visibility

Product and content are already competitive. Search presence is not — that's the entire gap.

On paper, funkraus already has one of the most complete offers in this niche: a single course covering both BZF I and BZF II, a free 2-module trial with no card required, the full 261-question official catalogue, a live AI radio-training feature, a real 100-question/60-minute mock exam for both tracks, and 15 published articles — more content than every competitor except one. **No other provider we found combines a fully structured self-paced course with AI voice training and a proper mock exam under one price.**

The catch: a `site:funkraus.de` search returns zero indexed pages. None of that product or content strength shows up in Google yet. funkraus isn't losing to competitors on quality — it's simply not in the race yet on the channel that matters most (organic search), while at least one competitor (bzf-kurs.de) already has real content-SEO traction and reviews, and the "AI radio training" pitch itself is no longer unique — three to four other tools now market a version of it.

1 The competitive landscape

Two genuinely different groups compete for the same searches. Tier A sells a full BZF I/II preparation the way funkraus does. Tier B sells one narrow piece of it (just the question catalogue, or just AI radio practice) — they don't replace a course, but they intercept the same searches and can expand later.

TIER A — FULL COURSES (DIRECT COMPETITORS)

funkraus**You**

€279 (from €399), one-time. Free 2 modules, no card. Video + audio + text + quiz + PDF per lesson. AI tower (live voice). Full 100Q/60min mock exam, both tracks.

FunkCoach**Watch closely**

App-based, 14 modules, 400+ vocab terms, AI voice dialogues with correction, "realistic exam mode." Closest match to funkraus's own pitch. License-code pricing, not disclosed.

bzf-kurs.de**Best content/SEO**

Hybrid: self-paced video + live small-group Google Meet radio practice. No AI. 7 blog posts + ~5 SEO pillar pages, 44 five-star Trustpilot reviews shown on-site.

Fluglehrerteam.com**Low threat**

Live ATC-server groups since 2005, €299/365 days. No AI. Dated design, blog dormant since 2019 (3 posts total). Trades on longevity, not on modern execution.

FlyCademy**Low threat**

Live Zoom cohorts, from €280, taught by controllers/instructors. No AI, no blog. Doesn't scale the way a self-paced product does.

Training4Pilots**Low threat**

7× 90-minute 1:1 sessions, €449. No AI. Has a blog, but it's a travel blog, not BZF content — no SEO value from it.

TIER B — POINT TOOLS (ADJACENT, NOT FULL COURSES)**bzf-simulator.de****Fast-moving**

Browser-based AI radio simulator, real-time phraseology feedback, 9 modules/57 drills. Closed beta/waitlist. Cross-promoted with bzf-fragen.de — same operator, building a network.

bzftraining.de**Fast-moving**

iOS app, AI controller voice via ElevenLabs + OpenAI speech recognition, instant phraseology feedback. Free to start. Radio training only, no theory course.

bzf-fragen.de**Low threat**

Question-catalogue trainer only, one-time payment, has its own blog. Competes for "learn the question catalogue" searches, not for the full-course buyer.

2 Positioning map

Plotting each provider on course completeness (theory, audio, quiz, exam simulation, both tracks) against how AI-driven their radio training is shows the actual white space: funkraus is currently alone in the top-right corner. FunkCoach is the only one closing in on it.

Qualitative positioning from public site research, not a measured score.

3

Side-by-side comparison

PROVIDER	FORMAT	PRICE	AI RADIO TRAINING	FULL MOCK EXAM	CONTENT / SEO	TRUST SIGNALS	THREAT LEVEL
funkraus	Self-paced, video+audio+text+quiz	€279 (free trial)	Live, voice	Yes, both tracks	15 articles + partner page	None yet	—
FunkCoach funkcoach.app	Self-paced app, 14 modules	Undisclosed (license code)	Voice + correction	"Exam mode" claimed	None found	None found	High
bzf-kurs.de	Self-paced + live small groups	From €89 (self-study) to full course	None	Question trainer only	7 posts + ~5 pillar pages	44★ Trustpilot	Medium-High
bzf-simulator.de	Browser AI radio drills only	Not public (closed beta)	Live, voice	No theory course	Cross-linked network w/ bzf-fragen.de	None found	Medium
bzftraining.de	iOS app, AI radio drills only	Free to start	Live, voice	No theory course	None found	None found	Medium
Fluglehrerteam.com	Live, ATC-server groups	€299 / 365 days	None	Generic trainer	3 posts, dormant since 2019	"Since 2005" longevity	Low
FlyCademy	Live Zoom cohorts	From €280	None	Not evident	None found	None found	Low

PROVIDER	FORMAT	PRICE	AI RADIO TRAINING	FULL MOCK EXAM	CONTENT / SEO	TRUST SIGNALS	THREAT LEVEL
Training4Pilots	1:1 live sessions	€449	None	Generic trainer	Unrelated travel blog	None found	Low
bzf-fragen.de	Question catalogue only	One-time (undisclosed)	None	No theory course	Has a blog (size unknown)	None found	Low

Ratings are based on what's publicly visible on each site in September 2026 (pricing pages, blogs, app-store listings), not verified customer data.

4

Current standing: what's working, what isn't

Real strengths

- **Broadest single offer in the niche.** No other provider bundles BZF I + II, a free trial, AI voice training, and a real 100Q/60min mock exam under one price.
- **Content volume already leads Tier A.** 15 published articles beats every full-course competitor except bzf-kurs.de's combined post+pillar count.
- **Transparent, low-friction pricing.** €279 one-time, visible upfront, free 2 modules with no card — most competitors hide price behind a contact form or checkout flow.
- **Modern design and execution.** Custom illustrations, animation, and a coherent brand — several direct

Real gaps

- **Not indexed yet.** `site:funkraus.de` returns zero results. Every content and product advantage above is invisible to search until this is fixed.
- **Zero trust signals.** No reviews, testimonials, or case studies, versus bzf-kurs.de's 44 Trustpilot reviews and Fluglehrerteam's "since 2005" longevity.
- **The AI pitch alone is no longer unique.** Three to four competitors (FunkCoach, bzf-simulator.de, bzfttraining.de) already market AI radio training — the differentiator has to be the complete package, not the feature in isolation.
- **No backlinks yet.** None of the research surfaced funkraus.de being linked from anywhere — no forum

competitors (Fluglehrerteam, Training4Pilots' course pages) look dated by comparison.

mentions, no directory listings, no partner links (the new /partner page is the first lever for this).

5 How many blog articles is "enough"?

Short answer: **volume was never the bottleneck — indexation is**. At 15 articles, funkraus already has more content than every full-course competitor except bzf-kurs.de (7 posts + ~5 pillar pages, ~12 pieces total). BZF is a narrow niche with limited search volume; nobody in this market has more than about a dozen content pieces. Publishing 100 articles wouldn't out-rank anyone if the pages behind them aren't crawled.

That said, there's a concrete ceiling worth reaching to own the topic outright — not by writing more, but by writing a few pieces no competitor has:

Now → immediately **Fix indexation first**

Confirm all 15 URLs are submitted in Search Console, check for crawl errors, and get the first backlinks flowing (the /partner page's mutual links are the fastest lever). No amount of new content matters until this resolves.

15 → ~22 articles **Close the comparison gap**

Add the handful of pieces bzf-kurs.de has that funkraus doesn't: a direct "online vs. Präsenzlehrgang" comparison, a cost-comparison page naming providers, and a BZF glossary page targeting single-term searches ("QNH", "Blindsendung", "PAN PAN MEDICAL") that a full article wouldn't rank for on its own.

~22 → ~30 pieces **Own the long tail**

Round out remaining exam-catalogue topics (transponder codes 7500, radio-failure edge cases already covered, weather phraseology/ATIS/VOLMET, BZF for glider/UL pilots) and add proof pages once available: student testimonials, a partner-club case study, a "why we built the AI tower" behind-the-scenes piece.

30 well-targeted pieces would give funkraus roughly 2.5× the content depth of the best-optimized competitor (bzf-kurs.de) — more than sufficient to dominate this specific niche, since no one else is even close to that volume.

6

When does funkraus become a real threat?

Five concrete, checkable milestones. Once all five are true, funkraus is the only provider in this market combining a complete course, AI training, a real mock exam, visible trust, and search presence — a position nobody currently holds.

Product completeness

Full course (12 modules), AI tower, and the 100Q/60-min mock exam are all built and live for both tracks. This is already done — confirm the exam-attempts migration has been run in production if it hasn't.

2

Indexed and ranking

Site fully indexed, and funkraus appears on page 1 for "BZF online Kurs" and 3–4 related head terms.

3

Content depth

~25–30 published articles and pillar pages live, closing the comparison and glossary gaps against bzf-kurs.de.

4

Visible trust

First 10–20 real reviews or testimonials displayed on the site — the single fastest way to close the gap with bzf-kurs.de's 44 Trustpilot reviews.

5

Distribution beyond search

3–5 signed flight-club/school partners live on /partner, each sending referral traffic and a backlink.

Realistic timeline: items 2–3 are largely execution funkraus already knows how to do (weeks, not months, given the content pipeline already built this session). Item 4 depends on the first real cohort of paying students — the free-trial funnel is already

built to produce that. Item 5 depends on club/school response to the new partner outreach. A reasonable target is **3–4 months** to have all five true, assuming outreach and indexing fixes start now.
